

I think these first two sources are very relevant :

1. Barlow, John Perry (1996), A Declaration of the Independence of Cyberspace,
2. Yochai Benkler. Coase's penguin, or, linux and "the nature of the firm". Yale Law Journal, pages 369-446, 2002.

The following papers are not specific to the Web. But could become relevant in their potential application to some Web developments (e.g. investigating potential connection between low/no transaction costs (Coase) and the sharing economy? , etc.
