## AAC

We are a business made up of highly experienced PLC SCADA controls and automation engineers who pride ourselves on being the best. Although working across several industries our core business is within the airport baggage domain in which, from our Heathrow base of operations, we are the market leaders. Successful delivery depends on people. If you want to deliver success in any industry, hire the best people and give them the freedom to do their work. Here at AAC Ltd, that's exactly what we do.

[www.aac-ltd.com](http://www.aac-ltd.com)

## AbilityNet

AbilityNet helps people of any age and with any disability to use technology to achieve their goals at home, at work and in education. We help businesses, charities and public bodies to design and maintain accessible websites, apps and other electronic media, making sure they reach every customer on every platform and that their digital services and content meets current legal requirements. The day-to-day work of the Accessibility Services Team is varied and can range from providing in-depth auditing of web/mobile websites and applications to carrying out design, wireframe and specialist assistive technology reviews. Depending on level, Accessibility and Usability Consultants also attend events, conduct user testing, provide training workshops and deliver seminars.

[www.abilitynet.org.uk/jobs](http://www.abilitynet.org.uk/jobs)

## Accenture

You probably have a lot of questions about your future career. Which is exactly why we attend Careers Fairs for you to come along and pick our brains. Drop by and ask us anything you want to know about Accenture – what it's like to work here, what opportunities we have for you, how we can transform your career. A team of Accenture employees will give you open, honest answers that could help you make some important decisions.

[www.accenture.com/gb-en/careers/graduate-home](http://www.accenture.com/gb-en/careers/graduate-home)

## Altran

Altran ranks as the undisputed global leader in Engineering and R&D services (ER&D), following its acquisition of Aricent. The company offers clients an unmatched value proposition to address their transformation and innovation needs, from initial concept through Industrialisation, to invent the products and services of tomorrow. For over 30 years, the company has provided expertise in aerospace, automotive, defence, energy, finance, life sciences, railway and telecommunications. Combined, Altran and Aricent generated revenues of €2.9 billion in 2017, with 45,000 employees in more than 30 countries. Altran's Intelligent Systems Expertise Centre, located in Bath, is involved in some of the UK's most exciting projects, including revolutionising the approach to rail delays and designing the latest traffic management software for UK airspace.

[www.altran.com/uk/en/careers/apply-now](http://www.altran.com/uk/en/careers/apply-now)

## Amadeus

Amadeus is changing how the world travels. Our systems are transforming billions of passenger journeys each year. We have operations in 195 markets, with a global community of over 16,000 people from more than 140 different nationalities. What does Amadeus do? Well simply put, we build the technology that powers the global travel industry. This includes flight search algorithms that determine the best route to a destination, systems that board over 4 million passengers every day, resource management tools for the world's busiest airports and software that handles a whopping 75,000+ transactions per second. Whether you're hailing a cab, booking a hotel or checking in at the airport, Amadeus is behind the technology. What we do is mission critical.

[amadeus.com/en](http://amadeus.com/en)

## Aquila Nuclear Engineering

Aquila is a Nuclear Mechanical Engineering Company created by, and comprised of, industry experts. The Aquila team has been involved in the nuclear industry for the past 40 years with experience from every licenced nuclear site in the UK. Our vision is to be the company of choice, delivering mission critical nuclear engineering solutions in Europe, the Commonwealth and Pacific Rim. We combine proven management expertise with technical and process innovation to solve nuclear engineering challenges. Aquila are looking to recruit and train the next generation of Engineers to join its dynamic team in solving the Nuclear Industry's future nuclear medicines, nuclear decommissioning, nuclear research and nuclear defence challenges in core areas of shielding, containment, remote handling, transport and packaging.

## HOT TIP

**Take along some copies of your up-to-date CV** and offer them to the companies you talk to. Some will ask you to apply online, but others will be glad of the opportunity to find out more about you and contact you after the event.

## Arm

We Are the Architects of Tomorrow

Arm defines the pervasive computing shaping today's connected world. Realized in 100 billion silicon chips, our device architectures orchestrate the performance of the technology transforming our lives — from smartphones to supercomputers, from medical instruments to agricultural sensors, and from base stations to servers.

The foundation of a global ecosystem of technology innovators, we empower the world's most successful business and consumer brands. Every day our thousands of partners embed more than 45 million Arm-based chips in products that connect people, enhance the human experience, and make anything possible. Extensible, scalable, and ever-evolving, it is a foundation that confirms how we lead by design — to serve today, anticipate tomorrow.

[www.arm.com/careers](http://www.arm.com/careers)

## Ash Wireless

ASH Wireless Electronics Ltd is a growing creative electronics design consultancy that specialises in wireless communications. Our award-winning designs have been in sectors as diverse as aerospace and consumer electronics, gaining experience in other sectors, including science and research, industrial and sustainable energy markets. Our MD, Steve Braithwaite, is also a part-time ECS lecturer in wireless communications. What's it like to be part of the ASH Team? It's a great environment within which to develop and gain experience in a number of fields, having doubled in size in the last 18 months. Openness, competence and excellence are things we care deeply about and our partnership approach with clients even extends to the nuts and bolts of our design process. We are looking for high calibre graduates to join our successful team in 2017, have a Tier 2 Visa licence, and also offer summer internships.

[www.ashwireless.com](http://www.ashwireless.com)

## ASV Global

ASV Global is a world leader in autonomous marine technology. The company designs, builds and operates ASVs on a global basis and has developed its own, industry leading, autonomous control system, ASView®. With offices in the UK, US and Brazil, ASV's 100+ employees support commercial, scientific, and military clients across the globe. The capabilities of the ASV Global team span the lifecycle of Autonomous Surface Vehicles with specialist expertise and experience in platform concept design, build and commissioning, operation and maintenance, control system development and advanced autonomy.

[www.asvglobal.com](http://www.asvglobal.com)

## BAE Systems Applied Intelligence

We are the cyber security arm of BAE Systems, looking for exceptional people to help us solve some of the world's most complex problems. We work globally as an Information Intelligence consultancy: deriving value from our clients' data, and delivering bespoke software and hardware systems that need to perform to the highest standards. We help our customers defend themselves against cyber-attacks, fraud and financial crime, enable intelligence-led policing and bring about digital change. We are BAE Systems Applied Intelligence.

[www.baesystems.com/en/cybersecurity/home](http://www.baesystems.com/en/cybersecurity/home)

## Bloomberg

Born in 1981, Bloomberg is the world's primary distributor of financial data and a top news provider of the 21st century. A global information and technology company, we use our dynamic network of data, ideas and analysis to solve difficult problems. Our customers around the world rely on us to deliver accurate, real-time business and market information that helps them make important financial decisions.

At Bloomberg, we are guided by four core values that are the foundation of our continued success: innovation, collaboration, customer service and doing the right thing. We harness the power of data and analytics to organize, understand and improve our world. It's our purpose. Come find yours.

[www.bloomberg.com/careers/technology/engineering](http://www.bloomberg.com/careers/technology/engineering)

## Bright Network

Bright Network is a careers service with a simple mission, to create a free to join innovative network of the brightest students and connect them with the best career opportunities. We focus on quality, our network now has 150,000+ members - all of whom are studying at, or have graduated from top universities. Everything we do for our members is free and diversity is critical to our mission in helping the brightest get ahead in their careers. 75% of our membership state-educated; 58% female; 40% BAME; 25% of our membership are STEM students. Clients: Accenture, Aldi, Bloomberg, Civil Service Fast Stream, Clifford Chance, Deloitte, Deliveroo, Dyson, Goldman Sachs, KPMG, Mars, M&S, Morgan Stanley, Police Now, Skyscanner, Teach First, UBS and Vodafone.

[www.brightnetwork.co.uk](http://www.brightnetwork.co.uk)

## HOT TIP

**Come prepared** – do some research in advance and find out which companies are the ones that best suit your interests and needs. Be prepared to ask some specific and focused questions to the company representatives that help you decide where it's best to make your applications.

**Ready to  
build the  
platform  
of tomorrow  
right now?**

We're building the world's most trusted information network for financial professionals. Our 5,000+ engineers, developers, and data scientists are dedicated to advancing and building new solutions and systems for the Bloomberg Terminal in order to solve complex, real-world problems.

## Cambridge Consultants

For almost 60 years, Cambridge Consultants has led the way in innovative product development. We take new products from idea to reality for some of the most exciting, innovative companies on the planet.

We're looking for brilliant graduate engineers, scientists, mathematicians, designers, developers and analysts who are looking for a place where their abilities will be recognised. A career with us offers technical challenge, variety, freedom to chart your own career path and great benefits.

We also offer paid internships ranging from summer work, to year placements. Interns gain valuable hands-on experience working as valued members of our multidisciplinary teams on real projects.

[www.cambridgeconsultants.com](http://www.cambridgeconsultants.com)

## Captec

We are a mid-size SME who, for a third of a century, have been designing and manufacturing specialist computers at the cutting edge of technology for deployment in the world's harshest environments. Our computers are used in a wide diversity of applications such as in life-critical healthcare, running the London Underground or running simulators that help to train future generations of pilots.

We have an exciting growth plan and are looking for passionate and enthusiastic individuals to join our expert teams to learn, personally develop and excel in a challenging and rewarding workplace. In addition to offering graduate jobs, we run a flexible programme across our entire business that offers short to medium term work experience through internships or placements as short as a few weeks to as long as a year, potentially re-joining us upon graduation. Because we are always looking for exceptional people, whether you are interested in sales and marketing, engineering design or development, like working with people in HR, or want to get involved manufacturing computers in operations, please come and talk with us, we will do our best to find a position for you. Please bring your CV!

[www.captec-group.com/careers/graduate-opportunities](http://www.captec-group.com/careers/graduate-opportunities)

## CausaLens

At causaLens we automate machine learning for time-series predictions. Our customers include some of the World's most prominent asset managers, hedge funds and technology companies.

At causaLens we are on a mission to create a machine that predicts the global economy in real-time. We develop the next generation of autonomous predictive technology for complex and dynamic systems. We call it the CLPU (causaLens Predictive Unit). We are a lean team and more than half have PhDs from top universities and have worked at leading institutions.

[www.causalens.com](http://www.causalens.com)

## Carnival UK

We deliver experiences of a lifetime to our guests as they traverse the globe on our impressive fleet of ships. We have exciting times ahead with ambitious growth and development plans and we need exceptional leaders to continue the Cunard Line and P&O Cruises success story.

Being Britain's most successful cruise company doesn't just happen – and it takes great passion and real dedication to maintain our position at the top. That's why we are looking for the next generation of technology and engineering leaders to join us. We offer roles in the heart of Southampton as well as worldwide, which will give you the opportunity to experience a wide range of technology or engineering disciplines. This however goes beyond developing your technical skills. You will get to understand how we operate and influences drive a complex business such as ours. We will help you to establish what it takes to be a future leader in our organisation and how each role is fundamental to creating unforgettable holiday happiness for our guests

[www.carnivalukcareers.co.uk](http://www.carnivalukcareers.co.uk)

## Circuitworx

CircuitWorx is an exciting, growing, local company designing electronics and software products for clients. We're a small team with a big range of projects; recent work has included designing and manufacturing a robotic UV mobile sterilization unit for healthcare applications, prototyping a novel surgical system, and developing remote diagnostics and monitoring for industrial breathing apparatus. We are committed to providing an open, honest and dependable design service. We're looking for talented, enthusiastic engineering graduates with embedded systems skills who can demonstrate initiative, a passion to learn and a willingness to 'get stuck in'. You'll be working in a supportive, friendly environment that values you as an individual with the chance to help shape the future of our dynamic young company.

[www.circuitworx.co.uk](http://www.circuitworx.co.uk)

## Cisco

At Cisco, each person brings their unique talents to work as a team and make a difference.

Yes, our technology changes the way the world works, lives, plays and learns, but our edge comes from our people. We connect everything – people, process, data and things – and we use those connections to change our world for the better. We innovate everywhere - From launching a new era of networking that adapts, learns and protects, to building Cisco Services that accelerate businesses and business results. Our technology powers entertainment, retail, healthcare, education and more – from Smart Cities to your everyday devices. We benefit everyone - We do all of this while striving for a culture that empowers every person to be the difference, at work and in our communities.

## Critical Software

Established in 1998, CRITICAL Software provides systems and software services for safety, mission and business-critical applications. We help to ensure our clients meet the most demanding quality standards for software safety, performance and reliability. Our data management solutions and services also provide clients with the information they need to manage their important assets and processes, helping them to achieve better business performance.

[www.criticalsoftware.com/en/careers](http://www.criticalsoftware.com/en/careers)

## Cyberscience

Well established, we produce a World-leading Business Intelligence solution. This is a highly competitive field. Clever ideas and smart working practices help maintain our leading edge. Working in an informal, but well managed environment, you will have the opportunity to design, implement and tune high level languages, compilers, networking software, database connections and the user experience so that our flagship product, Cyberquery, is the product of choice for Business Intelligence. So if you have a keen interest in software technology, have solid coding and debugging skills, and want to take on real responsibility from day one, come to our stand to find out more.

[www.cyberscience.com](http://www.cyberscience.com)

## Deme-Group

The Belgian dredging, environmental and marine engineering group DEME is an international market leader for complex marine engineering works. Driven by several worldwide challenges (rising sea level - the scarcity of raw materials - the growing need for energy - reducing CO<sub>2</sub> emissions - the contamination of our waterways and soils), DEME has transformed from solely a dredging and land reclamation company to a worldwide operating multidisciplinary and innovative marine engineering and environmental group. DEME has organically moved into several related activities, such as the financing of marine engineering and environmental projects, executing EPC related complex marine engineering projects including civil engineering works, the development and construction of renewable energy projects, providing services for the oil, gas and energy sector, the decontaminating and recycling of polluted soils and sludge, the mining of marine resources. DEME has the most modern, high-tech and versatile fleet.

[www.deme-group.com](http://www.deme-group.com)

## DevECS

DevECS is a student-run enterprise by the Electronics and Computer Science students at Southampton University, with the aim of delivering high-quality solutions in addition to giving students real-world experience in both project management and development. We take on a wide range of projects from organisations of any size, utilising skills from many students within ECS. DevECS aims to deliver unique, affordable and professional solutions.

[devECS@ecs.soton.ac.uk](mailto:devECS@ecs.soton.ac.uk)

## Documation

At Documation we have an awesome track record in training and nurturing young talent so, if you're looking for an internship, placement or work experience within an ever-evolving software company, come and see us.

Who are we? Documation is an agile, innovative software house on a mission to make every client's world a better place through process automation. This promise depends on us building brilliant software, combining best practices with cutting-edge automation technology including Software Robotics and AI. But most of all, it depends on us delivering exactly what we say we are going to - and that really matters to us. But we're not a corporate, we're much more of a team. A diverse and interesting team of consultants, developers, account managers and support - continually listening, learning, growing and developing. "Excellence is not a skill, it's an attitude."

[www.documation.co.uk](http://www.documation.co.uk)

## ecm Selection

ecm has over 30 years' experience placing bright, numerate candidates with the UK's most innovative technology companies. We recruit the best for the best - top companies in the high-tech sector. Our consultants are techies, and we use our knowledge and networks to assist in your job search. So leverage our relationships for ideas, let us help you prepare for interviews, and get the job you want. What's the catch? There's no hidden costs - our service is free to you, we work with top clients recruiting for top people.

[www.ecmselection.co.uk/electronics-jobs](http://www.ecmselection.co.uk/electronics-jobs)

So differentiate yourself and start your career with a progressive company rather than joining a grad scheme. Bring your CV and speak to us! - [keith@ecmselection.co.uk](mailto:keith@ecmselection.co.uk)

[www.ecmselection.co.uk](http://www.ecmselection.co.uk)

---

## HOT TIP

**Give yourself plenty of time at the event.** *There will be some companies you might not have thought about but whose stands make you want to find out more. Don't miss the opportunity! Come back later if the stands are busy or take a business card if there are some on the stand and write an email.*

## Efficio

Efficio Digital is the engineering arm of Efficio, the global procurement consultancy. Efficio is a fast-growth business that helps companies reduce costs, improve digital processes and upskill their procurement teams. The Digital department focuses on building data-driven, web-based applications embedded with Efficio's methodologies to support the reuse of knowledge, driving faster cycle times and better results long after the consultation phase is over. We follow the best engineering practices to develop our Software as a Service (SaaS) platform, paying close attention to quality and delivering value to clients. Above all, we strive to create an environment of continuous development through comprehensive training and mentorship programmes.

[www.efficioconsulting.com/en-gb/e-flow-technology](http://www.efficioconsulting.com/en-gb/e-flow-technology)

## Entrepreneur First

Entrepreneur First brings outliers together. EF funds exceptional individuals to find a cofounder from a cohort of top scientists, engineers, developers and industry experts. Cohort members build their own tech companies from scratch: by forming a founding team, refining an idea, creating a company and accessing EF's extensive investor network to grow. EF currently runs full-time programmes in London, Singapore, Berlin and Hong Kong. They are backed by Reid Hoffman (founder of LinkedIn) and Greylock Partners, Mosaic Ventures, Founders Fund, Lakestar and some of the world's best entrepreneurs. EF has built over 100 companies collectively worth over \$1B so far. Apply to their October programme to begin your tech startup journey.

[www.joinef.com](http://www.joinef.com)

## Eurotherm Schneider Electric

As part of the Schneider Electric business, Eurotherm is a leading global supplier of Industrial Automation and process control, measurement and data management solutions and services. Our innovative products and solutions are designed to bring real benefits to customers by optimising processes, operations and plant efficiency. Decades of experience in providing world-class process control, recording and automation are supported by a continuous research and development programme to ensure our solutions meet the modern challenges faced across a wide range of industries. Our customers are fully supported by a global sales and service network of highly qualified engineering personnel who understand the applications and industries they serve.

[www.eurotherm.co.uk](http://www.eurotherm.co.uk)

## FactSet

FactSet is a leading provider of financial data and analytic applications. Our products are used by analysts, portfolio managers, researchers and investment bankers at major financial institutions throughout the world. Our business is built on the creative use of technology and an unwavering dedication to client service. FactSet delivers superior analytics, service, content and technology to help more than 85,000 users see and seize opportunity sooner. We are committed to giving investment professionals the edge to outperform, with fresh perspectives, informed insights and the industry-leading support of our dedicated specialists.

[www.factset.com](http://www.factset.com)

## Filament.AI

At Filament.ai, we enable our clients to build AI capability into their organisation. We're approved partners of Google, IBM and Microsoft, and have worked with HSBC, American Express, NBCUniversal, Sealife, McDonalds, T Mobile and a number of private equity and hedge funds. We have 3 offices globally – London, Southampton and Toronto – and our team is expanding rapidly. We put a lot of faith in our people, treat them really well and have a lot of fun together. At the same time, we believe that our approach to AI will make us a global leader in enterprise grade AI technology.

[filament.ai](http://filament.ai)

## FlexTrade

We are passionate technologists who build real-time trading software for some of the world's largest asset managers, hedge funds and banks. A pioneer in the field, FlexTrade is internationally recognized for introducing FlexTRADER, the world's first broker-neutral, execution management trading system, which allows clients to completely control and customize their proprietary algorithms while maintaining the confidentiality of their trading strategies. In the FlexTrade office we have a collaborative and relaxed culture. We have a number of exciting opportunities for graduates, and are looking for enthusiastic team members who can demonstrate their problem-solving skills and passion for technology!

[flextrade.com](http://flextrade.com)

## FPR Group

Are you worried about finding a job in engineering after Uni? FPR Group can help you. The engineering industry is looking for fresh graduates, and our specialist Technical & Engineering division has 27 years of experience placing talented engineers like you in exciting roles across the UK. Our clients include market leaders across core engineering sectors including aerospace, mechanical, civil, maritime, and more. We can offer you open-minded, personalised help to kick-start your engineering career, and offer you lifelong guidance in such a fantastic industry.

## Frazer-Nash Consultancy

Frazer-Nash Consultancy is looking for talented people who thrive in an environment where they are presented with challenging problems to solve. As one of the UK's biggest systems and engineering consultancies we offer graduates with a Masters degree the opportunity to be involved in some of the most demanding projects around. Our consultants apply their expertise and know-how to develop, enhance and protect our clients' critical systems and processes. We're renowned for our work in the aerospace, transport, nuclear, marine, defence and power sectors and our security, resilience, cyber and information technology expertise.

If you love variety, we want to hear from you. Come and talk to us about graduate careers and summer placements.

[www.fnc.co.uk/careers/graduates.aspx](http://www.fnc.co.uk/careers/graduates.aspx)

## Future Worlds

Future Worlds is a startup platform and business incubator championing the innovative commercial opportunities developed by researchers and students at the University of Southampton. Providing exclusive access to a unique entrepreneurial ecosystem, it helps turn your ideas into market-ready solutions for a range of industries. Since its launch in 2015, Future Worlds has been inspiring University entrepreneurs to change the world with their ideas. From creating pitch videos, to offering advice and introductions to a global network of mentors, Future Worlds is helping at every step of an entrepreneur's journey.

[futureworlds.com](http://futureworlds.com)

## Galatea Associates

Galatea Associates are an IT Development organization specializing in building software for Financial Markets firms. Financial Institutions hire us to provide leadership and solutions in areas requiring functional knowledge, industry expertise, and technical innovation. We are small but growing and are looking for smart, energetic and driven graduates to join us.

- Understanding the Business  
Our Associates, with the help of Galatea's training program, learn the fundamentals of the investment banking industry and therefore have an unparalleled understanding of the business problems faced by end-users.
- End to End Collaboration  
Since our Associates know both the business and IT infrastructure of our clients' operations, we are uniquely positioned to collaborate with clients throughout project lifecycles rather than just the implementation.

[www.galatea-associates.com](http://www.galatea-associates.com)

## Gradcracker

Gradcracker is the UK's careers website for STEM students. We have more STEM employers, work placements and graduate roles than any other careers website, with over 200 leading employers offering thousands of opportunities at any one time. We're the first point of call for STEM students looking to secure work experience and graduate positions. Alongside our job opportunities, Gradcracker provides each registered user with a personalised dashboard, job alerts, careers resources, and much, much more. It's the most comprehensive and powerful tool for STEM students there is.

[www.gradcracker.com](http://www.gradcracker.com)

## Growth Street

At Growth Street, we're passionate about understanding growing businesses and helping them succeed. We're using technology to achieve disruptive change in the business loans sector. We operate a regulated platform that matches a wide range of investors' funds with ambitious businesses. Our marketplace offers borrowers lines of credit from £25k up to £2m. Our product is similar to a traditional bank overdraft, but we want to be smoother, faster and more efficient!

[www.growthstreet.co.uk](http://www.growthstreet.co.uk)

## Imagination Technologies

At Imagination, we're all about innovation, with a razor-sharp focus on creating technology that pushes the boundaries of what's possible. We're best known for PowerVR, a 3D graphics chip found inside millions of iconic devices around the world, such as smartphones, digital TVs and in car infotainment systems. We continue to drive the digital revolution forward with powerful, cutting-edge designs that enable our customers to build world-changing, AI-enabled electronics. Our AI chip designs run neural networks very quickly, making your phone smarter and lets your smart speaker understand you. Technology moves fast, and to build on our successful history means we are always looking to adapt and change. We embrace fresh ideas and new ways of thinking. That's how our teams shape tomorrow's technology so that we can help our customers create products that entertain, inform and enrich people's lives all around the globe.

## Interfacio

Interfacio has over 16 years' experience providing a unique specialist recruitment service within the Audio, Music, Broadcast and related technology sectors. We are based in London but recruit for jobs globally. We use our extensive industry knowledge and experience to attract candidates and identify an optimum skills and personality fit. Our R&D Engineering clients are typically manufacturers of audio equipment such as Professional Sound systems for recording studios, Live Sound equipment for events, and software for producing and composing music. The types of jobs we recruit for range from entry level graduate roles to senior engineering managers, including acoustics engineers, electronics engineers and DSP software developers. So give yourself the best chance, bring your CV and talk to us – bobby@interfacio.com

[www.interfacio.com](http://www.interfacio.com)

## iSolutions

iSolutions provides IT infrastructure and support for the University of Southampton. The services we provide range from routine teaching applications to bespoke research software plus all the server and networking equipment in between. We really value our students and so we recruit up to 20 interns every year in a wide variety of roles. If you are looking for paid summer work then come and talk to us at our stall.

[www.southampton.ac.uk/isolutions](http://www.southampton.ac.uk/isolutions)

## ITDev

ITDev provides fully-managed technology design services based on the Southampton Science Park. Despite being a small company with a family atmosphere, our software and electronics designs touch the lives of millions of people every day. Whether it is through our contributions to the Android operating system, or through our work on broadcast equipment that delivers television content throughout the world, you have probably experienced the results of some of our projects already. We are looking for the next cohort of high-calibre graduates, who share our passion for engineering, to join our successful team in 2019. Our staff have the freedom to innovate and to grow independently, and are able to make a real difference to the business.

[www.itdev.co.uk/careers](http://www.itdev.co.uk/careers)

## Jazz Networks

JAZZ NETWORKS; tech start-up, founded 2016, CyberSecurity, Enterprise Data/ Network Security. Driving Artificial Intelligence and Machine Learning across the guts of data flow and user behaviour to add effective management of security layers. Tackling the Snowden problem. We are protecting enterprise systems by dissolving the perimeter and the need for a zero-trust approach. We are providing end-to-end security from users to servers, with real-time application and user visibility.

[www.jazznetworks.com](http://www.jazznetworks.com)

## Lascar Electronics

Lascar is a leading provider of digital panel instruments, data loggers and custom design & manufacturing solutions. Our group HQ is located in a pleasant rural environment close to the New Forest with facilities in the USA and Hong Kong. Our dynamic engineering team is involved with all aspects of design, we encourage staff to take ownership of the product, acquire new skills and broaden their knowledge. We have opportunities for bright individuals to join us, ideally they should be familiar with both analogue and digital disciplines, alongside embedded coding skills, but we also have opportunities for software developers and mechanical design. Additionally we offer opportunities for career development both within Lascar and other companies within our parent Group, Larasian. If you are motivated by seeing the end product containing your creative input then come and talk to us.

[www.lascarelectronics.com](http://www.lascarelectronics.com)

## Leonardo

Leonardo is a global high-tech player in Aerospace, Defence and Security. Leonardo operates in four sectors – Helicopters; Aeronautics; Electronics, Defence & Security Systems, and Space, and prides itself on working closely with customers to deliver innovative solutions through the application of advanced technology. It employs 46,000 people worldwide, offering many exciting careers opportunities through its award winning graduate schemes. The company has a range of business and engineering opportunities across its sites.

Our two-year Graduate Development Framework provides graduates with the best possible start to their career. It's specifically tailored for graduates, across both technical and non-technical functions, and places an emphasis on continuous training and opportunities for career development within a Transnational Company through local and internationally based modules.

[uk.leonardocompany.com](http://uk.leonardocompany.com)

---

## HOT TIP

**Introduce yourself and be prepared to talk about yourself and what you're doing.** It should be a two-way flow of conversation in which you can find out interesting information not just about the company but about the application process and the possibility of progression and working in areas that are of special interest to you.

## Lumina Learning LLP

Lumina Learning creates innovative psychometrics and qualifies and maintains a global network of practitioners who specialise in organisational change and long-term improvement. By taking a humanistic approach and viewing people as “human beings” rather than “human doings” Lumina Learning practitioners can help organisations transform their performance by transforming their people. We are passionate about improving personal effectiveness at all levels within organisations.

[www.luminalearning.com](http://www.luminalearning.com)

## Master of Malt

Master of Malt is a multi-award-winning online drinks retailer that uses advanced technology to empower its passionate band of spirits lovers and beer nuts to deliver the world’s best drinks buying experience. We were recently named Global Online Retailer of the Year for the sixth time in seven years at Whisky Magazine’s Icons of Whisky 2018. We’re known not only for our vast range of single malt Scotch whiskies, fine spirits and more, but also for our market-leading focus on innovation and customer experience.

We already turn over many tens of millions of pounds each year, and over the next 5 years we’re going to build a billion pound global business. We’re looking for remarkable people to join us on that journey.

[www.masterofmalt.com](http://www.masterofmalt.com)

## Matchtech

Matchtech are a leading engineering and technology recruitment specialist who have been supplying specialist resource to UK and international clients across a wide range of industry verticals including: Defence, Aerospace, Automotive, Energy, Infrastructure and commercial electronics. We have been working as a key university partner for a number of years – helping upskill students on their journey from academia to industry as well as providing them with employment opportunities via our clients.

Pop over to see us at the fair with any career questions or simply to find out more about the current recruitment market and the evolving opportunities that exist

[www.matchtech.com](http://www.matchtech.com)

## Meggitt Avionics

Meggitt Avionics is a leading specialist producer of air data sensing systems, cockpit displays and attitude sensing systems. We have a wide product range, supporting civil and military programmes including Typhoon (Eurofighter), Westland EH101, Boeing Apache and a raft of other platforms. Our product portfolio continues to increase with strong design innovation and development of new technologies. We are part of Meggitt PLC, a UK FTSE 250 Aerospace, Defence and Energy company with global facilities, specialising in smart engineering for extreme environments.

[www.meggitt.com](http://www.meggitt.com)

## Micro Focus International

Talented software developers are at the heart of Micro Focus. Our 3 year graduate scheme places developers in an agile environment delivering innovative software solutions. Working alongside industry experts you’ll be learning on the job while being given the opportunity to expand into more diverse roles. We enjoy a great team spirit working in a relaxed, goal orientated atmosphere on a wide range of technologies and platforms. Based in Newbury we collaborate with our Design Centres around the world to deliver high quality products to our extensive customer base. We recognise the importance of passion and talent and offer a package designed to attract and retain the best.

At Micro Focus we develop software and build careers.

[www.microfocus.com](http://www.microfocus.com)

## Moortec

Moortec Semiconductor is no ordinary company. We are looking for talented and enthusiastic self-starters with inquiring minds who are willing to support our cutting edge work in semiconductor IP design. We licence our in-chip monitoring products to a range of Blue Chip companies around the globe. From modest beginnings in 2005, we have now established ourselves as market leaders and a forward-thinking company with a truly global reach.

Moortec has a dynamic team of highly skilled analogue and digital engineers and designers, dedicated to producing compelling embedded subsystem IP solutions for Process, Voltage & Temperature (PVT) monitoring, targeting advanced node CMOS technologies from 40nm down to 7nm. Our motivated sales and support staff provide excellent support for IP application, placement, integration and results analysis during production test.

[www.moortec.com](http://www.moortec.com)

## MThree Consulting

MThree is a technology Consultancy offering fast-track graduate careers at global banks and leading tech companies. Our Alumni Graduate Programme provides specialist training, career coaching, and salary increases every 6 months to help you progress quickly in Software Development, IT Support, Cyber Security, Anti-Financial Crime, DevOps or Business Analysis. Work with our team to choose the best career pathway for your skills and goals, before attending a paid 4-8 week training programme at one of our global training academies. Training will prepare you for your target role, incorporating problem solving tasks and group presentations in addition to traditional instructor-led learning.

Once onsite, you’ll become part of our global graduate community which offers a calendar of business, charity and social events with Alumni from across our client base. With access to LinkedIn learning and additional training at the Alumni Academy, you’ll continue to develop over the next 2 years before either converting to a full-time employee with our client, or continuing with MThree.

## National Citizen Service

The National Citizen Service (NCS) is run by Youth Options in Southampton, a charity which aims to improve the life chances of young people. NCS is a government funded summer programme for 15-17 year olds. Young people from diverse backgrounds come together to learn new skills and step outside their comfort zone. NCS is a chance for them to become more confident, putting their talents together to make an impact on the local community. If you are looking for paid summer work/ volunteering opportunities come along and meet us to find out how you can join us and support our young people on their NCS journey this summer! The work is incredibly rewarding, we look forward to meeting you.

[www.ncsy.es.co.uk](http://www.ncsy.es.co.uk)

## Netcraft

Netcraft is an internet services company based in Bath, England, with products related to:

Providing internet security services, including anti-fraud and anti-phishing services, application testing, code reviews, and automated penetration testing. Providing research data and analysis on many aspects of the internet, Netcraft has explored the internet since 1995 and is a respected authority on the market share of web servers, operating systems, hosting providers, ISPs, encrypted transactions, electronic commerce, scripting languages and content technologies on the internet

[www.netcraft.com/jobs](http://www.netcraft.com/jobs)

## New Voice Media

Our award-winning cloud contact centre solution for sales and service helps build personal relationships with every contact, whether customer or prospect. We believe in being a business that helps people, aspiring to make things easier and taking the pressure off. NewVoiceMedia help businesses help people, one conversation at a time. We do that in technology environments where our people are free to express themselves, work together, solve problems and create solutions. Our agile teams sit within a growing Development function, so you get the benefits of working in an intimate environment, balanced with the security of being part of the bigger picture. Our teams provide the right environment to get inspired, putting our thirst for emerging technology to use and to learn as you go.

[www.newvoicemedia.com](http://www.newvoicemedia.com)

## Newton Europe

We are Newton.

We're a team of the brightest and most curious minds with a fundamental belief that every organisation can be better. We crack some of the toughest business and public sector challenges of the day. Not with reports or copy and paste thinking. But by pinpointing and implementing the changes that will make the biggest difference – and then guaranteeing our fees against delivering measurable results.

We're offering Operations Consultant and Digital Solutions Consultant roles. We're looking for people who want to get stuck in and use their initiative and creativity to deliver far-reaching and measurable results to clients. In return, you'll experience a culture that is genuinely social, supportive and collaborative as well as receiving a starting salary of £45-£50k

## Nourish Care

Nourish is a young, innovative company which is transforming the Health and Social Care Industry by empowering Carers with smart technology and enhancing the way care is given; both reducing paperwork and generating real clinical impact. Nourish utilises technological developments, user-led design and innovative research to facilitate genuine and lasting social impact.

Nourish's core product is an intuitive care management solution which supports recording at the point of care. With a focus on saving time and making information both accessible and directly useful to care, care teams are able to make informed decisions to improve life quality for the people they support. Further, with records that are secure, accurate and compliant, evidencing care to regulatory bodies becomes much more manageable.

[nourishcare.co.uk](http://nourishcare.co.uk)

## Northrop Grumman

Northrop Grumman is among the leading defence and security suppliers in Europe with more than 2,000 employees and significant long-established businesses in the UK, France, Germany, Italy, and the Netherlands. We offer the best of our US and European Research and Development, and technology to deliver solutions that help solve our customers' defence and security challenges. Calling on our global experience and 100-year European heritage, we provide everything from satellite payloads to maritime command and control systems, synthetic training, special mission aircraft, land vehicle maintenance, repair and overhaul, unmanned air systems, tactical communications and much more for our European customers. We may not always be visible but Northrop Grumman's technology is all-pervasive, as is our commitment to building strong European businesses to serve our customers for the long-term.

## Nquiring Minds

Nquiringminds is a British technology company based at the Chilworth Science Park. nquiringminds specialise in advanced AI powered analytics, build security into hardware and develop innovative solutions to meet the real world problems of data sharing in such markets as Smart Cities, Cyber Security, Data Analytics and Internet of Things. nquiringminds has a broad customer base including: local government, industry, health agencies, network operators and military/security services. Our solutions have won awards including: Cyber Savvy Business of the Year 2016, Cisco Top 15 IOT Company, Cabinet Office Open Data Champion and Parliamentary award for Data Innovation. We are looking for JavaScript Developers, Embedded Device Developer (IOT Engineer), Data Scientists, Security Engineer.

[www.nquiringminds.com](http://www.nquiringminds.com)

## Offshore Ops

Founded in 2004, Offshore Ops Ltd has specialized in producing bespoke hardware and software solutions for the offshore loading and bunker operations. A full product range, ranging from offshore loading telemetry systems to professional asset maintenance software applications, has enabled Offshore Ops to become a valued business partner with a host of leading international oil and shipping companies. Through the benefits of a close and uniquely personal relationship with each client, Offshore Ops Ltd is able to leverage its expertise to help design and implement solutions that enable our clients to optimize the productivity of their people, processes and technologies. We are based in Four Marks, Hampshire, with an additional branch in KwaZulu-Natal, South Africa.

[www.offshoreops.com](http://www.offshoreops.com)

## Pexip

Pexip was founded in 2012 with the aim of developing a purely software-based and virtualized video communication platform. The company now has around 160 employees in 17 countries with 55 in an R&D team split across sites in the UK and Norway. Our partnerships with Microsoft and Google, along with our own functionally-rich product offering, means Pexip is now firmly established in the market and enjoying strong commercial growth.

Our product is constantly evolving in response to technical advances and customer requirements, meaning we are constantly facing new and exciting challenges. Working at Pexip is immensely rewarding, both in terms of creating a robust, scalable, high-availability product and the fact that individual engineers can have a real influence on features and functionality within a friendly and supportive team environment.

[pexip.com](http://pexip.com)

## Quantexa

Quantexa was incorporated in March 2016 and has quickly demonstrated extraordinary success including raising significant investment funding (Series B funding - \$20million in July 2018), completing a number of highly effective client engagements and expanding to a team of more than 100. The team includes experts with many years of experience in developing data analytics and AI software products, building advanced algorithms, marketing, selling and implementing these technologies together with our partners.

Our software solutions apply advanced analytical techniques to huge volumes of data, producing single customer/business views and networks of relationships and activity, for data lake and real-time usage. This underpins a range of automated decision making and artificial intelligence (AI) solutions, producing world class accuracy and outcomes. The products can be deployed at customer site in full cycle agile deployments or in the cloud as a software as a service. To date, we have focused on combatting fraud and financial crime but we are rapidly expanding the use cases into business development, risk and beyond. Our customer base is typically blue-chip, tier one and global organisations, including: financial services, oil and gas, travel and transport, government and insurance.

Our head office is in London near Waterloo Station, and we have offices in North America, Europe and Australia, with plans to extend globally.

[www.quantexa.com](http://www.quantexa.com)

## Redlux

High Precision, Data-Rich, Non-Contact Metrology Based in Romsey, we design and manufacture state of the art non-contact, optical CMM systems to measure high precision critical components quickly and accurately. Our systems are highly versatile and provide unparalleled levels of 3D capture for component measurement in seconds, measuring any geometry including: sphere, asphere, cylinder, internal bore, cone/taper, step height or freeform, in any material such as polished or rough metals or ceramics and polymers.

In addition, our highly repeatable, fast and accurate, automated optical inspection metrology systems remove all human error from scratch-dig evaluation process for a range of components. We employ a range of engineering and physics specialists across a range of disciplines including software and mechanical engineering.

[www.redlux.net](http://www.redlux.net)

**Gain some insight into the company's recruitment process:** How does it work? What are the key aspects of it? What is the company looking for? What skills and background are particularly important? What course modules might be of particular value for your future?

## Roke

Roke are the UK's leading provider of independent research, development & advisory services in technology. We have 60 years' experience behind us and fuel our clients' success with a forward-thinking team that combines some of the finest engineering, scientific and mathematical minds in Britain. At Roke we make it our business to understand our clients' key issues, to provide end-to-end tailored solutions. With extensive experience in fields of autonomy, connectivity, data analytics and cyber in both the civil and military domains, we understand the technical complexities of modern and future systems. Our team of 350 engineers & consultants develop new concepts, capabilities and systems to protect what matters most to our clients. Roke imagines a more secure world. A world where technology protects, rather than exposes. A world where expert engineers, consultants and business support staff collaborate to protect what matters most to our clients. If you are highly motivated and knowledgeable in the fields of autonomy, connectivity, data-analytics and cyber come and join our team. You will work on ground-breaking projects that will shape the digital world in which we live and work. Each day our people use their intelligence to create new insights and deliver technological advances for our clients. We are offering you the chance to be part of something amazing

[www.roke.co.uk/careers](http://www.roke.co.uk/careers)

## Sanctuary Graduates

Since launching in 2009, we have become the leading graduate recruitment agency providing brilliant opportunities across all industry sectors, including science, technology, business, engineering, finance and much more. We not only provide you with your dream internship, placement or graduate opportunity, but also help you with your CV and interview technique to give you the best chance of getting hired by one of our industry-leading clients! It's our mission to make sure you land your dream role, so we provide you with opportunities that are suited to your degree background, CV and past work experience.

[www.sanctuarygraduates.co.uk](http://www.sanctuarygraduates.co.uk)

## Searchlight Security

Searchlight Security is a world leading cyber security company providing forensic and investigative tools and threat intelligence to law enforcement and the commercial sector protecting against the dangers of the dark web.

[slcyber.io](http://slcyber.io)

## Sensata Technologies

Sensata Technologies microelectronics centre was founded as Swindon Silicon Systems, in 1978. We have a long-established pedigree in the design and supply of integrated circuits for automotive and industrial applications. Today as part of Sensata Technologies, the global automotive and industrial system component supplier, we design and supply microelectronic systems for sensor applications that typically include MEMS sensors, analogue and digital integrated circuits and innovative packaging systems. Our teams are involved from the definition of the product through to designing a solution for high volume manufacture and supporting the customer in application support.

Located on a single site in Wiltshire we have departments supporting all aspects of our business including design and test engineering, product engineering, quality assurance, failure analysis, finance, purchasing, production, human resources and sales and marketing. Our engineering graduates will interact with all sides of the business as they develop their careers. We are proud to promote a diverse workforce as we constantly strive to develop and deliver innovation. We provide fulfilling and rewarding career paths, in a variety of engineering and support roles including career opportunities within the broader Sensata business.

[www.sensata.com](http://www.sensata.com)

## Senseye

Senseye is an industrial operations software tool, designed to be used on the shop-floor by the maintenance and operations people who need to keep things running smoothly and ensure that unplanned downtime stays down. Like all good Industry 4.0/Industrial IoT software, Senseye is designed to integrate seamlessly and provide maximum value by leveraging your existing investments. It focuses on automatically delivering advanced Predictive Maintenance insights in an easily understandable manner.

Senseye integrates seamlessly with your existing infrastructure investments, using data captured by your factory historian or IoT middleware to understand the future health of your machinery. The process is entirely automated, so there is no need for extensive condition monitoring or knowledge to get it up and running.

tweet us @sflakesoftware

## Souqbox

Every B2B product reseller/manufacturer has surplus inventory from time to time. We think digital markets, tailored to each market segment, will emerge to solve this problem. We also believe that the most successful operators will have the same model already working offline and see online as the next logical step. Many won't want to do this themselves; and why should they when they can have a scalable state of the art marketplace from SouqBox. SouqBox is a SAAS platform that makes it really easy to launch a B2B market /ecommerce capability and we are building a suite of CRM & ERP applications to integrate with this over the next 12 months. By the end of 2019, our customers will be able to run their entire business on SouqBox and relax about the tech.

[souqbox.co](http://souqbox.co)

## SouthWestSensor

SouthWestSensor Ltd, is a University of Southampton spin-out company and developer of microfluidics based sensors for environmental and health monitoring. Excellent progress has already been made in translating the nanodroplet based technology into a compact autonomous and low-cost water sensor to detect nutrients and pollution. Short-term focus will be on launching a first environmental product line whilst also fine-tuning the healthcare proposition, where a wearable chemical sensor for acute care is under development.

[southwestsensor.co.uk](http://southwestsensor.co.uk)

## SPI Lasers

SPI lasers is a wholly owned subsidiary of the TRUMPF group, which is a leading designer and manufacturer of optical fibre-based lasers. Our headquarters are based in Southampton with additional UK sites in Rugby. We have a worldwide presence with sales and support services in Asia and North America. The ethos of the company has always been to empower its employees by combining personal skills training with technical tuition and hands on experience. SPI believes in collaboration and communication at all levels which creates a highly productive and creative environment. We have exciting internships and graduates opportunities, if you want to join our innovative and dynamic team please apply via our website or submit your CV to [recruitment@spilasers.com](mailto:recruitment@spilasers.com)

[www.spilasers.com](http://www.spilasers.com)

## STFC Technology

STFC Technology is the leading provider of electronic and microelectronic systems for many high-profile international projects. Our solutions range from single ASICs to large systems that use tens of thousands of custom ICs and hundreds of multi-million gate FPGAs. Our leading facilities and varied projects provide unique and challenging career opportunities for enthusiastic electronic and microelectronic engineers. Opportunities include: Analogue and digital ASIC design using the latest deep sub-micron technologies; design of complex systems using embedded microprocessors and FPGAs; the design of advanced CMOS image sensors (CIS) using state of-the-art microelectronics technologies. You will be recruited directly into a specific role within the framework of our IET-accredited professional development scheme, the first step towards gaining Chartered Engineer status.

[www.technology.stfc.ac.uk](http://www.technology.stfc.ac.uk)

## talent.io

talent.io is the simplest way for software engineers to find great jobs in innovative companies. Create your profile in a few minutes by importing your LinkedIn profile. No CV or cover letter needed: companies apply to you, and you decide who you want to talk to. It's that simple to find your next job. We operate in Paris, Lyon, Lille, London, and Berlin. Over 100,000 developers and 3000 companies (including Deezer, Blablacar, Parrot, N26, and many of the best startups in Europe) have already signed up on the platform and hundreds of offers are made every week to software engineers looking for their next dream job.

[talent.io](http://talent.io)

---

## HOT TIP

If you are looking for internships, **find out what kind of experience is gained from internships.** Is the work organized around a project? Do you work by yourself or in a team? What kind of skills do you need and what will you gain? How likely is it to be offered a permanent job at the end of your internship?

## Tekever UK

TEKEVER Autonomous Systems develops air frames and ground station software for the commercial market. Missions have been flown for the European Maritime Safety Agency (EMSA) monitoring vessels at sea, helping people in distress and mapping oil spills. The UK office is located locally, at the University Science Park, in Chilworth and is looking for graduates and interns, for product development and research projects. The ground control systems are developed in the UK, using Python, Visual Studio and C#. There is research and advanced development of intelligent systems (AI/ML) for mission planning and for on-board auto-pilot functions. There is also embedded development and electronic design for aircraft-based systems to reduce the overhead on the air to ground communication systems.

[www.tekever.com](http://www.tekever.com)

## Telesoft Technologies

Are you interested in computer sciences, technology, engineering or maths? Do you have great problem-solving skills and the ability to learn quickly? We do things a little differently at Telesoft Technologies, there isn't only one route in to a position here; we recognise talent and ability in everyone. Telesoft's engineering apprenticeship schemes could kick start your career with a company that doesn't just allow personal development and originality, but expects it.

Telesoft is an independent global provider of Cyber Security Government Infrastructure products and services, from our headquarters based in Blandford Forum, Dorset, we develop, manufacture and support systems and applications that generate revenue, keep critical infrastructure operational and important data safe. Our culture encourages collaboration, flexibility and innovation which allows our engineering teams to create products that are always one step ahead of the pack. As an engineering-led company, Telesoft has been nurturing talent in engineering for nearly 30 years. We will provide you with the tools, techniques and mentoring that will motivate, develop and guide your engineering career in the technology sector. If this sounds like something you would like to be part of, send us your CV with a covering letter setting out why you would like to be considered for one of our apprenticeship schemes.

[www.telesoft-technologies.com/careers](http://www.telesoft-technologies.com/careers)

## Ultra Electronics

Ultra Electronics is a world-leading Engineering Group of companies. Our specialist sectors are; Defence & Aerospace, Security & Cyber, Transport and Energy Company. It was formed in October 1993 and listed on the London Stock Exchange in October 1996.

Ultra Electronics, Energy, 1 of 20 Ultra Electronic businesses, specialises in providing safety systems (engineering systems) to the nuclear energy industry. Based in Dorset (UK), and Texas (US), our specialist sensors, detectors, instrumentation and control systems have been protecting nuclear power sites across the globe. We have a very well established Graduate programme for those passionate about Electronic, Mechanical and Systems Engineering. You'll be working alongside world experts on some of the latest technologies and learning to become our leaders / subject matter experts of the future.
