

Class Activity

In your groups

- Make a list of advice/guidance for preparing and presenting information to an audience
- Think of every possible perspective which you can imagine
- Write the list down
- Use this as a basis for a presentation....

The (extra) Challenge

- Each group will go in turn,
- So try to adjust your presentation to do stuff differently to the previous groups!!
- I will draw lots for the turn taking ☺

The Specification

In your groups use 7 minutes to plan a short
(4 minutes timed) joint presentation to the rest of the class

The pitch:

Make a presentation which advises students how to make an excellent presentation and how to avoid making dreadful presentations:

- What are the aspects of a good presentation
- What are things which can go wrong in a presentation
- What are the challenges of a group presentation?
- How would you make sure you scored top points against the marking scheme?

At the end (final 1 minute)

tell us

- what background tasks
- what preparation

you would need to do to prepare a well researched and illustrated version of this presentation

The Resource

Refer to the detailed mark scheme to help you think about what you need to include in your advice

Further copies of the markscheme can be downloaded from
