SUPERVISOR WORKSHOPS 2013

Managing Difficulties on Placement
Wednesday 27th November 1pm– 4.30pm
Room E1001 Building 67 (Nightingale)

This workshop aims to provide supervisors with an opportunity to review strategies for managing some of the most common difficulties on placement. These could include managing trainees who are defensive, over anxious or lacking in self awareness or perhaps working with trainees who have had specific areas for development identified by previous supervisors. The workshop will draw on supervisors' experience and aims to provide an opportunity to address issue of current concern to supervisors in addition to developing resources for addressing difficulties within supervision more generally. It is suitable for both new and experienced supervisors and is free to those who supervise for the programme.
