

COMPI205 Presentation Programme 2013-14

General Notes – Please read carefully

You are welcome to attend any of the presentation sessions as a member of the audience. Presentation topics are included below for information and planning.

If you are presenting

- Although each group has been asked to prepare a 10-minute presentation, and should allow for 5 minutes of questions, 20 minutes has been allocated to each presentation slot to ensure that handovers do not disrupt the schedule.
- If you are in a presentation group you are expected to be present during all the presentation during your allocated session.
- The two academics, who attend your presentation session, will be responsible for determining your group mark.
- You will receive immediate verbal feedback on the session in an “all group” slot immediately after the presentations for your session have been completed
- If you want to video your session so that you can review it as a group after the event, please organise that independently

If you are marking/observing

- Marking groups are expected to complete a mark sheet for each presentation that they observe.
- Hand in the completed mark sheet at the end of the presentation session
- You will receive an individual mark for the participation that will reflect the criticality of your marking and the quality of your observations.
- Members of the marking groups may leave once they have handed in their completed mark sheets
