It's as easy as
YouTube,
and it's your
University's
content!

- Extending the EPrints platform to develop an institutional repository supporting collaboration and sharing in learning and teaching.
- Using Web 2.0 content-centred presentation.
- Enabling tagging and minimal inter-operable metadata to capture and present multi-media resources.
- Supporting collaborative partnerships and new communities to enrich the student experience.

Sharing through EdShare

With Me - initial sparks, emerging genius, mature and complete "stuff"

The University - sharing between disciplines, collaboration across faculties

The World – showcasing the products of the whole institution

EdShare is created by the EdSpace Project, part of the JISC Institutional Exemplars Programme
